

BioTinkerers' Laboratory

CULTURE IT. TEST IT. DISCOVER IT.

LAUNCHING NEXT MONTH!

A brand-new, student-run lab providing hands-on mentorship and complete freedom to design and conduct your own biological experiments.

Tinkerers' Laboratory, 2nd Floor DSSE

WHAT DO WE DO?

WET LAB

Hands-on molecular biology, DNA extraction, SDS page gel runs, and more synthetic biology experiments

COMPUTATIONAL BIO

Genomic sequence analysis, protein structure prediction, bio-algorithms, and applying machine learning to complex bio-data

QuizTiMe

Question 2

What is the name of the world’s first genetically engineered luminescent fish?

A. Neon Tetra

B. GloFish

C. Laser Goldfish

D. Catfish

Question 2

What was the name of the world’s first genetically engineered luminescent fish?

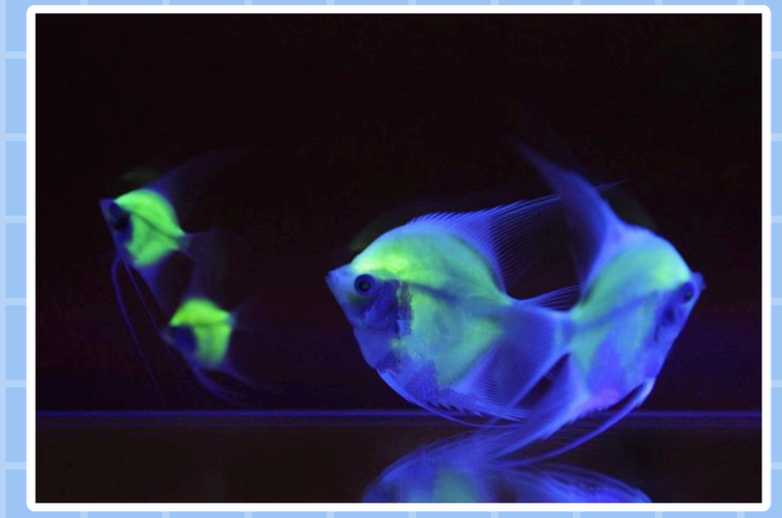

A. Neon Tetra

B. GloFish

C. Laser Goldfish

D. Catfish

Genetically Modified Organism (GMO)

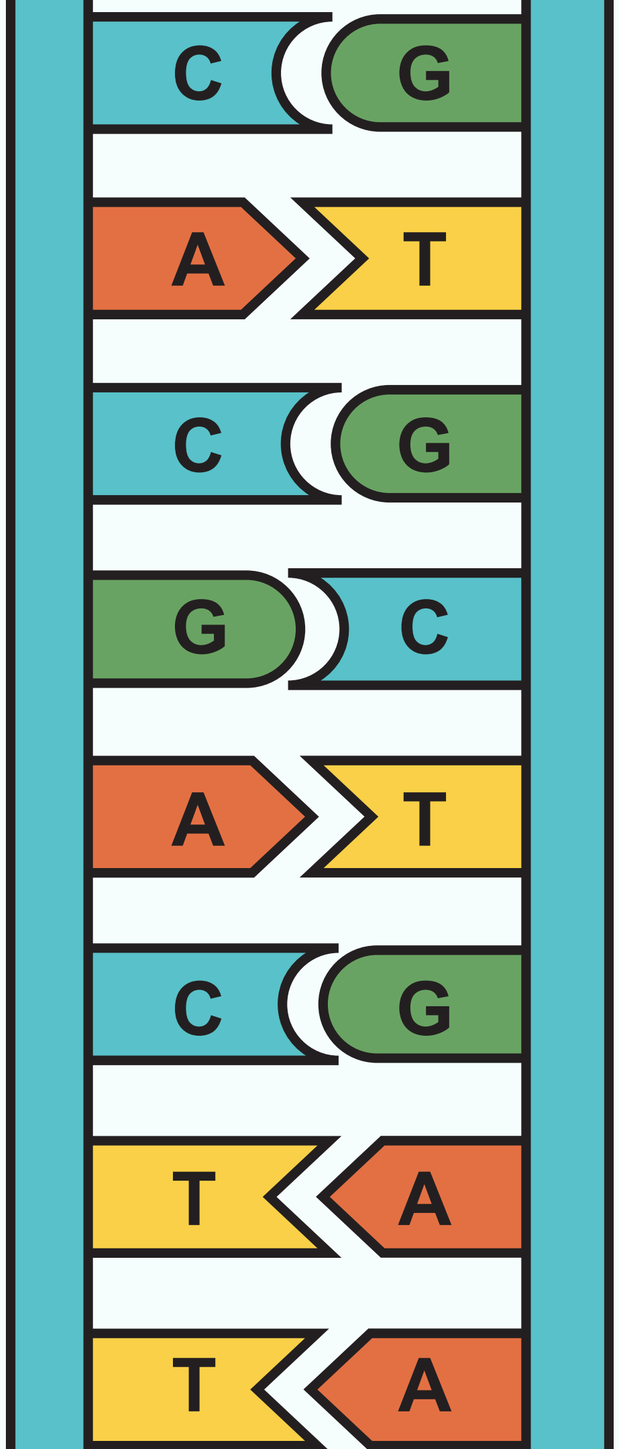

Any plant, animal, or microorganism whose DNA has been altered using genetic engineering tools rather than natural breeding

Strawberry DNA Extraction

In under five minutes, we turn strawberries into cloudy, visible threads of pure genetic code

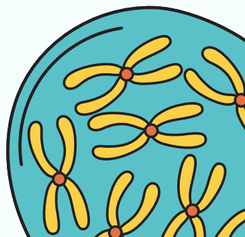

WHO CAN JOIN?

Anyone who wants to explore biology through fun experiments, build cool projects and go beyond theory

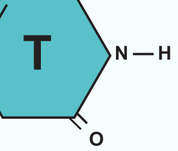

ZERO Prerequisites!!

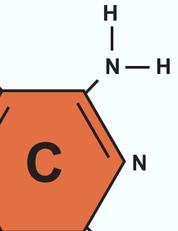

Drop by to have a look around and stay tuned for upcoming projects and events!

COMING UP NEXT

- Speaker Series
- Research Mentorship
- Wet Lab Training
- Student Led Research
- Project Showcases
